

Local Public Agency (LPA) Project Manager Certification Program (PMCP)

by Ed Thornton, KDOT Bureau of Local Projects, Road Team Leader

The Federal Highway Administration (FHWA) and Kansas Department of Transportation (KDOT) conduct project reviews each year. These reviews frequently identify issues with project construction and contract administration compliance. To address these concerns, KDOT in association with FHWA and the Kansas Local Technical Assistance Program (LTAP) have developed the KDOT “Project Manager Certification Program” (PMCP) that all Local Public Agency (LPA) “Person in Responsible Charge” or Project Manager (PM) must complete prior to serving as a PM for a project with Federal or State funding.

This certification module is entitled “*Project Construction and Contract Administration*” (PMCP-C). Additional modules may be added in the future based on results from future project reviews.

Beginning June 1, 2018, LPA-Certification requirements for LPA-Administered projects with Federal or State funding will include this certification for the project’s “Person in Responsible Charge” or PM. If more than one PM is involved with the project and responsible for a particular phase, the LPA must identify which PM is responsible for a particular phase of the project. The LPA must notify the Bureau of Local Projects immediately if the project’s PM is removed or reassigned.

This certification module consists of watching 14 short videos and taking an online test that consists of 65 questions based on the videos. Each person identified as a PM for any phase of the project is required to be certified. Certification under this program must be renewed every three years.

The videos and certification test are available on the Kansas LTAP website at <https://kutc.ku.edu/training-webinars>. You will be required to take the test after watching the videos. Your answers will be sent to KDOT for tabulation, and you will be notified by KDOT via email if you passed the test. You may repeat the test if you do not initially pass. You may refer back to the videos while answering the questions. Contact Ed Thornton, ed.thornton@ks.gov for additional information.
