

# **KANSAS COUNTY TRANSIT DEPENDENT DEMOGRAPHICS**

2023 ESTIMATES

## How to Use this Guide

The purpose of this guide is to help transit agencies with their grant applications to KDOT for operating assistance and provide agencies with an understanding of the transit need and demand in their counties and cities.

The following guide is an easy-to-use resource that provides county by county demographic data for the state of Kansas. The guide consists of three components, a glossary, a table of contents, and demographic data by county.

- **Glossary**: The glossary provides definitions of the categories of demographic data provided. This provides meaningful context and allows the user to have a better understanding of the data presented in the chart.
- **Table of Contents**: The next feature of this guide is the table of contents. The table of contents is separated by county and provides ease of access to the user by allowing them to click on the county name within the table of contents which takes them directly to the corresponding page within the guide.
- **Demographic data by County**: Once a user has navigated to the page with the desired county demographics, the table provided lists the necessary demographic data for a transit agency within that county to complete grant applications and evaluate the transit demand in an area. This data includes the number of people within that demographic in that county and percentage of that demographic from the total population.

**Tip: Hold CTRL+CLICK on your COUNTY NAME in the table of contents for direct access to your county demographic data chart.**
